# Contents

<b>1. Abbreviations</b>	<b>24</b>
<b>I. User Requirements Specification (URS)</b>	<b>25</b>
<b>2. Introduction</b>	<b>5</b>
2.1. Background . . . . .	5
2.2. Purpose and Scope . . . . .	5
2.3. Applicable Regulatory Concerns . . . . .	6
<b>3. Program Requirements</b>	<b>7</b>
3.1. Trial Designs . . . . .	7
3.1.1. Group Sequential and Inverse Normal Designs . . . . .	7
3.1.2. Adaptive Designs Based on Fisher’s Combination Testing Principle . . . . .	9
3.1.3. Conditional Dunnett Test Designs . . . . .	9
3.2. Simulation Tools . . . . .	10
3.3. Analysis Tools . . . . .	10
3.3.1. Test Decision . . . . .	10
3.3.2. Estimating Treatment Effects . . . . .	11
3.3.3. Conditional Power Calculations . . . . .	11
3.4. Usability . . . . .	11
3.5. Performance . . . . .	12
<b>4. Data Requirements</b>	<b>13</b>
4.1. Input . . . . .	13
4.2. Output . . . . .	14
<b>5. Life Cycle Requirements</b>	<b>15</b>
5.1. System Maintenance . . . . .	15
5.1.1. CRAN as Daily Quality Control Service . . . . .	15
5.1.2. Bug Report Form . . . . .	15

5.1.3. Version Control . . . . .	16
5.2. Training of Users . . . . .	16
<b>II. Functional Specification (FS)</b>	<b>17</b>
<b>6. Introduction</b>	<b>5</b>
6.1. Purpose and Scope . . . . .	5
6.2. Dependencies . . . . .	6
<b>7. Functionalities</b>	<b>7</b>
7.1. Business Objects . . . . .	7
7.2. Functions . . . . .	10
7.2.1. Group Sequential Designs . . . . .	10
7.2.1.1. The Prototype Case . . . . .	10
7.2.1.2. Boundary Shape Designs . . . . .	11
7.2.1.3. Symmetric Designs . . . . .	12
7.2.1.4. alpha-Spending Function Designs . . . . .	13
7.2.1.5. beta-Spending Function Designs . . . . .	14
7.2.1.6. Maximum and Expected Sample Size . . . . .	16
7.2.1.7. Delayed Response Designs . . . . .	18
7.2.2. Inverse Normal Design . . . . .	21
7.2.3. Fisher's Combination Test . . . . .	23
7.2.3.1. Type I Error Rate for Fisher's Combination Test . . . . .	23
7.2.3.2. Designs . . . . .	28
7.2.4. Sample Size Calculation . . . . .	31
7.2.4.1. Normal Response . . . . .	31
7.2.4.2. Binary Response . . . . .	35
7.2.4.3. Survival Data . . . . .	39
7.2.4.4. Count Data . . . . .	47
7.2.5. Power Calculation at Given Sample Size . . . . .	51
7.2.5.1. Normal Response . . . . .	51
7.2.5.2. Binary Response . . . . .	53
7.2.5.3. Survival Data . . . . .	54
7.2.5.4. Count Data . . . . .	55
7.2.6. Analysis Tools . . . . .	57
7.2.6.1. Test Statistics . . . . .	57
7.2.6.2. Confidence Intervals and $p$ -Values . . . . .	61
7.2.6.3. Conditional Power and CRP . . . . .	67
7.2.6.4. Automatic Boundary Recalculations . . . . .	71

7.2.7.	Multi-Arm Designs . . . . .	72
7.2.7.1.	Adaptive Closed Test Procedure . . . . .	72
7.2.7.2.	Intersection Tests . . . . .	75
7.2.7.3.	The Conditional Dunnett Test . . . . .	77
7.2.7.4.	Conditional Power and CRP . . . . .	79
7.2.7.5.	Repeated Confidence Intervals and $p$ -Values . . . . .	80
7.2.7.6.	Binary and Survival Response . . . . .	81
7.2.8.	Enrichment Designs . . . . .	84
7.2.8.1.	Adaptive Closed Test Procedure . . . . .	84
7.2.8.2.	Intersection Tests . . . . .	85
7.2.8.3.	Conditional Power and CRP . . . . .	87
7.2.8.4.	Repeated Confidence Intervals . . . . .	88
7.2.8.5.	Stratified Analysis . . . . .	89
7.2.8.6.	Binary and Survival Response . . . . .	90
7.2.9.	Simulation Functions . . . . .	93
7.2.9.1.	Simulating One Hypothesis Designs . . . . .	93
7.2.9.2.	Simulating Multi-Arm Designs . . . . .	97
7.2.9.3.	Dose Response Relationships in Multi-Arm Designs . . . . .	101
7.2.9.4.	Selecting Treatment Arms in Multi-Arm Designs . . . . .	101
7.2.9.5.	Simulating Enrichment Designs . . . . .	102
7.2.9.6.	Effect Specification in Enrichment Designs . . . . .	105
7.2.9.7.	Selecting Populations in Enrichment Designs . . . . .	106
7.2.9.8.	Reproducibility of Simulation Results . . . . .	107
7.3.	Data Input . . . . .	108
7.4.	Output Specification . . . . .	117
7.4.1.	Output Formats . . . . .	117
7.4.2.	Trial Design . . . . .	119
7.4.2.1.	getDesignGroupSequential . . . . .	119
7.4.2.2.	getDesignInverseNormal . . . . .	120
7.4.2.3.	getDesignFisher . . . . .	121
7.4.2.4.	getDesignConditionalDunnett . . . . .	122
7.4.2.5.	getDesignCharacteristics . . . . .	123
7.4.3.	Sample Size and Power Calculation . . . . .	125
7.4.3.1.	getSampleSizeMeans and getPowerMeans . . . . .	125
7.4.3.2.	getSampleSizeRates and getPowerRates . . . . .	127
7.4.3.3.	getSampleSizeSurvival and getPowerSurvival . . . . .	128
7.4.3.4.	getSampleSizeCounts and getPowerCounts . . . . .	131
7.4.4.	Accrual and Survival Time . . . . .	134
7.4.4.1.	getAccrualTime . . . . .	134

7.4.4.2.	getPiecewiseSurvivalTime . . . . .	134
7.4.5.	Trial Design Simulation . . . . .	137
7.4.5.1.	getSimulationMeans . . . . .	137
7.4.5.2.	getSimulationMultiArmMeans . . . . .	138
7.4.5.3.	getSimulationEnrichmentMeans . . . . .	140
7.4.5.4.	getSimulationRates . . . . .	141
7.4.5.5.	getSimulationMultiArmRates . . . . .	143
7.4.5.6.	getSimulationEnrichmentRates . . . . .	144
7.4.5.7.	getSimulationSurvival . . . . .	146
7.4.5.8.	getSimulationMultiArmSurvival . . . . .	148
7.4.5.9.	getSimulationEnrichmentSurvival . . . . .	150
7.4.5.10.	getSimulationCounts . . . . .	151
7.4.6.	Analysis Dataset . . . . .	153
7.4.6.1.	getDataset – Means . . . . .	153
7.4.6.2.	getDataset – Rates . . . . .	153
7.4.6.3.	getDataset – Survival Data . . . . .	154
7.4.6.4.	getDataset – Enrichment Survival Data . . . . .	154
7.4.7.	Analysis Results . . . . .	156
7.4.7.1.	getAnalysisResults – Group Sequential Design . . . . .	156
7.4.7.2.	getAnalysisResults – Inverse Normal Design . . . . .	157
7.4.7.3.	getAnalysisResults – Fisher Design . . . . .	158
7.4.7.4.	getAnalysisResults – Multi-Arm Inverse Normal Design . . . . .	159
7.4.7.5.	getAnalysisResults – Multi-Arm Fisher Design . . . . .	160
7.4.7.6.	getAnalysisResults – Conditional Dunnett Design . . . . .	161
7.4.7.7.	getAnalysisResults – Enrichment Inverse Normal Design . . . . .	163
7.4.7.8.	getAnalysisResults – Enrichment Fisher Design . . . . .	164
7.4.7.9.	getClosedCombinationTest . . . . .	165
7.4.8.	Analysis Results – Stage Results . . . . .	167
7.4.8.1.	getStageResults – Means . . . . .	167
7.4.8.2.	getStageResults – Rates . . . . .	168
7.4.8.3.	getStageResults – Survival Data . . . . .	169
7.4.8.4.	getStageResults – Multi-Arm Means . . . . .	169
7.4.8.5.	getStageResults – Multi-Arm Rates . . . . .	170
7.4.8.6.	getStageResults – Multi-Arm Survival Data . . . . .	172
7.4.8.7.	getStageResults – Enrichment Means . . . . .	173
7.4.8.8.	getStageResults – Enrichment Rates . . . . .	175
7.4.8.9.	getStageResults – Enrichment Survival Data . . . . .	176

7.4.9.	Analysis Results – Conditional Power . . . . .	178
7.4.9.1.	getConditionalPower – Means . . . . .	178
7.4.9.2.	getConditionalPower – Rates . . . . .	178
7.4.9.3.	getConditionalPower – Survival Data . . . . .	179
7.4.9.4.	getConditionalPower – Multi-Arm Means . . . . .	179
7.4.9.5.	getConditionalPower – Multi-Arm Rates . . . . .	180
7.4.9.6.	getConditionalPower – Multi-Arm Survival Data . . . . .	180
7.4.9.7.	getConditionalPower – Enrichment Means . . . . .	182
7.4.9.8.	getConditionalPower – Enrichment Rates . . . . .	182
7.4.9.9.	getConditionalPower – Enrichment Survival Data . . . . .	183
7.5.	Graphical Features and Plot Functions . . . . .	183
7.5.1.	Plot: Design . . . . .	185

<b>III. Software Design Specification (SDS)</b>	<b>268</b>
<b>10. Introduction</b>	<b>5</b>
<b>11. Principles</b>	<b>6</b>
11.1. Avoid Package Dependencies . . . . .	6
11.2. Respect Clean Code Rules . . . . .	7
11.2.1. Clean Code – Current Situation in R . . . . .	7
11.2.2. Clean Code – rpact Coding Rules . . . . .	8
11.3. Use Inline Code Documentation . . . . .	9
11.4. Use Assert Functions . . . . .	10
11.5. Use Double Colons to Call R Core Constants and Functions . . . . .	10

<b>12. Layer</b>	<b>12</b>
12.1. User Interface . . . . .	12
12.2. Computation . . . . .	13

## **IV. Verification 290**

### **14. Overview 5**

### **15. Test Plan (TP) 6**

15.1. Testing Requirements and Strategy . . . . .	6
15.1.1. Handling of Testing Failures . . . . .	8
15.1.2. Time Report Types - User, Sys, Real . . . . .	8
15.1.3. System Requirements . . . . .	9
15.2. Installation Plan . . . . .	10
15.3. Test Plan . . . . .	12
15.3.1. Check Package Dependencies . . . . .	12
15.3.2. Check rpact Functions . . . . .	13
15.3.3. Run Unit Tests . . . . .	14
15.3.3.1. Testing the Class 'Dataset' . . . . .	14
15.3.3.2. Testing that 'getDataset' Throws Exceptions as Expected . . . . .	86
15.3.3.3. Testing datasets for enrichment designs . . . . .	87
15.3.3.4. Testing the Class 'PlotSettings' . . . . .	129

15.3.3.5. Testing Class 'TrialDesignPlan'	130
15.3.3.6. Testing Class 'TrialDesignSet'	163
15.3.3.7. Testing Class 'Dictionary'	167
15.3.3.8. Testing the Class 'SimulationResults'	175
15.3.3.9. Testing Class 'SummaryFactory'	176
15.3.3.10. Testing Class 'PiecewiseSurvivalTime'	193
15.3.3.11. Testing Class 'AccrualTime'	236
15.3.3.12. Testing the Analysis Means Functionality for One Treatment	267
15.3.3.13. Testing the Analysis Means Functionality for Two Treatments	291
15.3.3.14. Testing 'getStageResults'	323
15.3.3.15. Testing the Analysis Rates Functionality for One Treatment	335
15.3.3.16. Testing the Analysis Rates Functionality for Two Treatments	382
15.3.3.17. Testing the Analysis Survival Functionality for the Group Sequential Design	414
15.3.3.18. Testing the Analysis Survival Functionality for the Inverse Normal Design	427
15.3.3.19. Testing the Analysis Survival Functionality for the Fisher Design	438
15.3.3.20. Testing Analysis Enrichment Means Function (one sub-population)	448
15.3.3.21. Testing Analysis Enrichment Means Function (two sub-populations)	477
15.3.3.22. Testing Analysis Enrichment Means Function (more sub-populations)	497
15.3.3.23. Testing Analysis Enrichment Means Function (more sub-populations)	511
15.3.3.24. Testing Analysis Enrichment Rates Function	516
15.3.3.25. Testing Analysis Enrichment Survival Function	539
15.3.3.26. Testing the Correct Input Validation of All Anal- ysis Functions	557
15.3.3.27. Testing the Analysis Means Functionality for Three or More Treatments	559
15.3.3.28. Testing the Analysis Rates Functionality for Three or More Treatments	843
15.3.3.29. Testing the Analysis Survival Functionality for Three or More Treatments	898

15.3.3.30. Testing the Function Get Observed Information Rates . . . . .	925
15.3.3.31. Testing Dunnett AS 251 Functions . . . . .	931
15.3.3.32. Testing Assertion Functions . . . . .	939
15.3.3.33. Testing the Output Format Functions . . . . .	954
15.3.3.34. Testing .reconstructSequenceCommand . . . . .	984
15.3.3.35. Testing Result Object Print Output . . . . .	988
15.3.3.36. Testing Core Utility Functions . . . . .	989
15.3.3.37. Testing Utilities . . . . .	1034
15.3.3.38. Testing the Fisher Design Functionality . . . . .	1049
15.3.3.39. Testing the Group Sequential and Inverse Normal Design Functionality . . . . .	1060
15.3.3.40. Testing the Group Sequential Design Functionality with Beta Spending . . . . .	1115
15.3.3.41. Testing the Sample Size Calculation of Count Data Designs for Different Designs and Arguments . . . . .	1135
15.3.3.42. Testing the Power Calculation of Count Data Designs for Different Designs and Arguments . . . . .	1206
15.3.3.43. Testing the Sample Size Calculation of Testing Means for Different Designs and Arguments . . . . .	1219
15.3.3.44. Testing the Power Calculation of Testing Means for Different Designs and Arguments . . . . .	1288
15.3.3.45. Testing Design Plots . . . . .	1350
15.3.3.46. Testing the Sample Size Calculation of Testing Rates for Different Designs and Arguments . . . . .	1358
15.3.3.47. Testing the Power Calculation of Testing Rates for Different Designs and Arguments . . . . .	1394
15.3.3.48. Testing the Sample Size Calculation of Survival Designs for Different Designs and Arguments . . . . .	1426
15.3.3.49. Testing the Sample Size Calculation of Survival Designs for Other Parameter Variants . . . . .	1744
15.3.3.50. Testing Other Functions of the Sample Size Calculator for Survival Designs . . . . .	1805
15.3.3.51. Testing the Power Calculation of Survival Designs for Different Designs and Arguments . . . . .	1830
15.3.3.52. Testing the Power Calculation of Survival Designs for Other Parameter Variants . . . . .	1900
15.3.3.53. Testing Design Utility Functions . . . . .	1948
15.3.3.54. Testing Logger Functions . . . . .	1964

15.3.3.55. Testing the Get Object R Code Function . . . . .	1965
15.3.3.56. Testing Parameter Set Utility Functions . . . . .	1967
15.3.3.57. Testing Simulation Counts Function . . . . .	1969
15.3.3.58. Testing Simulation Means Function . . . . .	1986
15.3.3.59. Testing Simulation Means Function in a System- atic Way . . . . .	2045
15.3.3.60. Testing Simulation Rates Function . . . . .	2209
15.3.3.61. Testing Simulation Survival Function . . . . .	2275
15.3.3.62. Testing the Simulation of Survival Data for Dif- ferent Parameter Variants . . . . .	2462
15.3.3.63. Testing user defined 'calc subjects/events func- tions' . . . . .	2637
15.3.3.64. Testing Simulation Enrichment Means Function .	2643
15.3.3.65. Testing Simulation Enrichment Rates Function .	2691
15.3.3.66. Testing Simulation Enrichment Survival Function	2756
15.3.3.67. Testing Simulation Multi-Arm Means Function .	2818
15.3.3.68. Testing Simulation Multi-Arm Rates Function . .	3015
15.3.3.69. Testing Simulation Multi-Arm Survival Function	3200
15.3.3.70. Testing Performance Score Functions . . . . .	3382
15.3.3.71. Testing Simulation Plots . . . . .	3392
15.3.3.72. Testing Simulation Utilities . . . . .	3412
15.3.3.73. Testing Class 'SummaryFactory' . . . . .	3424
15.3.3.74. Testing Package Functions . . . . .	3427

16.2.2.5. Beta Spending Non-Binding Kim & DeMets . . . . .	4558
16.2.2.6. Beta Spending Binding Kim & DeMets . . . . .	4626
16.2.2.7. Beta Spending Non-Binding Hwang, Shih, & DeCani . . . . .	4703
16.2.2.8. Beta Spending Binding Hwang, Shih, & DeCani .	4839

16.2.3. Operational Qualification of Fisher’s Combination Test . .	4990
16.2.3.1. method = equalAlpha . . . . .	4992
16.2.3.2. method = fullAlpha . . . . .	5051
16.2.3.3. method = userDefinedAlpha . . . . .	5106
16.2.3.4. method = noInteraction . . . . .	5245
16.2.4. Operational Qualification of Sample Size vs Power Calcula- tion . . . . .	5272
16.2.4.1. Testing Means . . . . .	5272
16.2.4.2. Testing Rates . . . . .	5450
16.2.4.3. Testing Survival . . . . .	5557
16.2.5. Operational Qualification of Final Confidence Intervals . .	5666
16.2.5.1. Test of Mean in One Sample . . . . .	5669
16.2.5.2. Test of Means in Two Samples . . . . .	5733
16.2.5.3. Test of Rate in One Sample . . . . .	5797
16.2.5.4. Test of Rate in Two Samples . . . . .	5820
16.2.5.5. Test in a Survival Design . . . . .	5843
16.2.6. Operational Qualification of Overall Repeated $p$ -Values . .	5843
16.2.6.1. Kim & DeMets Alpha-Spending Designs and Fisher Combination Test with equalAlpha . . . . .	5845
16.2.6.2. Wang & Tsiatis Designs and Fisher Combination Test with fullAlpha . . . . .	6070
16.2.6.3. Summary . . . . .	6292
16.2.7. Operational Qualification of Repeated Confidence Intervals	6375
16.2.7.1. RCIs for One Mean . . . . .	6377
16.2.7.2. RCIs for Two Means . . . . .	6429
16.2.7.3. RCIs for One Rate . . . . .	6481
16.2.7.4. RCIs for Two Rates . . . . .	6533
16.2.7.5. RCIs for Survival . . . . .	6585
16.2.7.6. Summary . . . . .	6637
16.2.8. Operational Qualification of Dunnett Distribution and Quantiles . . . . .	6679
16.2.8.1. Dunnett Quantiles for Known Variance . . . . .	6681
16.2.8.2. Dunnett Probabilities for Known and Unknown Variance . . . . .	6683
16.2.9. Unit Test Protocol . . . . .	6715
16.3. Performance Qualifications (PQ) . . . . .	6761

# 1. Abbreviations

Abbreviation	Description
CRAN	The Comprehensive R Archive Network ( <a href="http://cran.r-project.org">cran.r-project.org</a> ) is a network of ftp and web servers around the world that store identical, up-to-date versions of code and documentation for R
FS	Functional Specification
R	R is 'GNU S', a freely available language and environment for statistical computing and graphics which provides a wide variety of statistical and graphical techniques: linear and nonlinear modelling, statistical tests, time series analysis, classification, clustering, etc. ( <a href="http://r-project.org">r-project.org</a> )
RStudio	Integrated development environment (IDE) for R ( <a href="http://rstudio.com/products/rstudio">rstudio.com/products/rstudio</a> )
SDS	Software Design Specification
TL	Test Log (Test Protocol)
TP	Test Plan
URS	User Requirements Specification
